Informatics Engineering

Phone: +62-895-2926-4606

Email: zidaneabbas99@gmail.com

LinkedIn: Zidane Abbas M

Bontang, Kalimantan Timur

I am a Diploma student in Informatics Engineering who is passionate about data analysis and technology. During my internship at PT Tambang Raya Usaha Tama in the Operational Management Department, I worked with Excel and Python to process and analyze data, including data entry, cleaning, and visualization. Alongside my interest in data, I also have experience in building websites, which helps me strengthen both my technical skills and analytical thinking.

EXPERIENCE

PT Sinarta Multi Jasa Sertifikasi, Work | December 2025 – Now

IT Officer & Visual Design Support

- Developed and maintained the company's main website and internal web applications to support operational and administrative processes.
- Implemented digitalization of administrative workflows to improve data management efficiency and reduce manual process
- Designed visual materials such as posters and website assets to support company branding and communication needs.
- Managed and input company data accurately to support daily operations and reporting requirements.
- Built and maintained interactive dashboards to support data analysis and management decision-making.

Surya Raya Badminton, Work | Juny – August 2025

Admin

- Handled court booking request and maintained accurate daily schedules.
- Recorded sales of food and bevarages and updated dailiy transactions.
- Managed storage and inventory of food and beverage supplies in the werehouse.
- Assisted in maintaining cleanlines and readiness of the badminton courst
- Supported basic customer service needs to ensure a smooth visitor experience

PT Tambang Raya Usaha Tama, Internship | Feb – Mei 2025

Data Manager

- Performed daily operational data entry into Microsoft Excel following the specified format.
- Developed several simple programs to assist in consolidating data from various source files into single file.
- Automated parts of manual workflows to improve time efficiency and reduce the risk of input errors.
- Supported reporting processing using Microsoft Excel, Microsoft Fabric, Python.

PT GreenNusa Computindo, On The Job Train | Jul – Sep 2023

Web Development

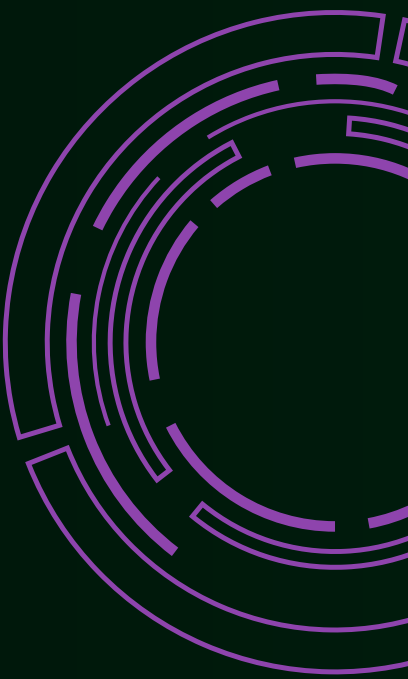

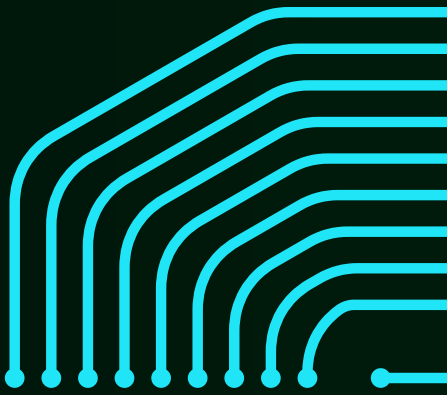

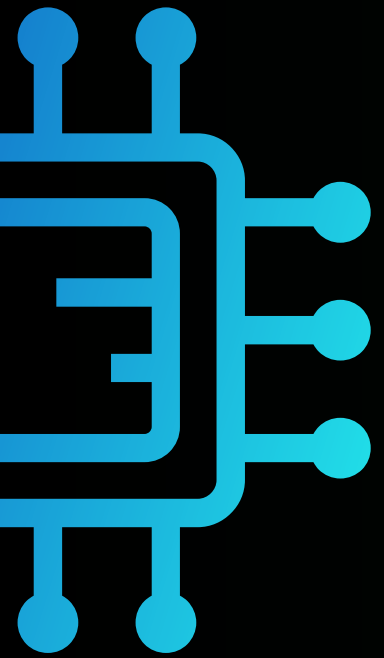

- Learned and applied the fundamentals of web development using the Laravel framework.
- Assisted in the development and improvement of features in ongoing web projects.
- Studied the structure and management of databases used in Laravel-based application development.

EDUCATION

Politeknik Negeri Samarinda | 2021-2024
Associate Degree in Informatics Engineering | **IPK: 3.87**

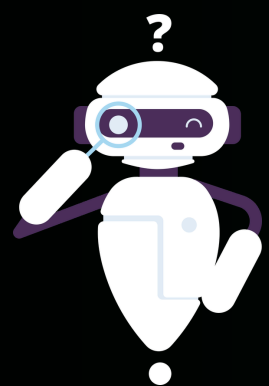

SKILLS &
INTEREST

- **Hard Skills** : Microsoft Excel | Microsoft Fabric | Python (Numpy & Pandas) | SQL | Power BI
- **Soft Skills** : Adaptive | Detail-oriented | Problem Solving | Collaborative | Communicative
- **Language: English** (Toefl 400), **Bahasa Indonesia** (Native)
- **Certifications** : Junior Web Development by Badan Nasional Sertifikasi Profesi (BNSP), The Data Analyst Course by Udemy Course, Kelas Data Analyst Python 2025 by Udemy Course.

Web Development

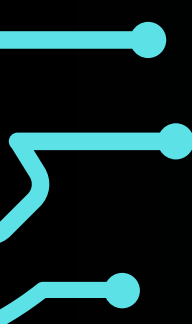

About Me

Hi, I'm **Zidane Abbas Mallaniung**, a graduate of Informatics Engineering. I've explored various fields such as **data analyst**, **web development**, and **data management**.

To improve my skills, I've joined several online courses, including **Dicoding** and **Udemy**. I've also joined the **Junior Web Development** program by Kominfo.

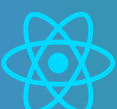

I'm a disciplined and curious learner who enjoys working, learning new things, and growing through collaboration and experiences

Skills

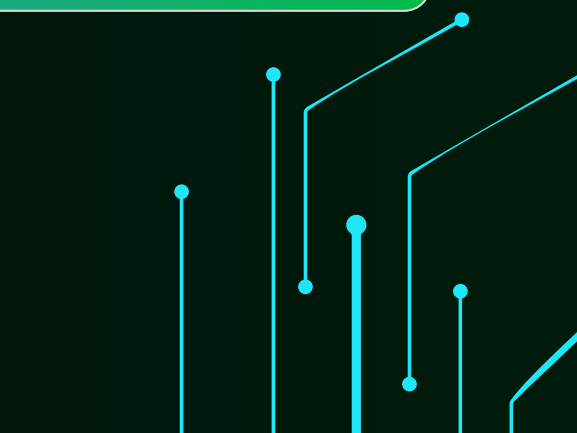

Web Development

-  **React**
-  **Node JS**
-  **MongoDB**
-  **Express JS**
-  **Laravel**

Data Analysis

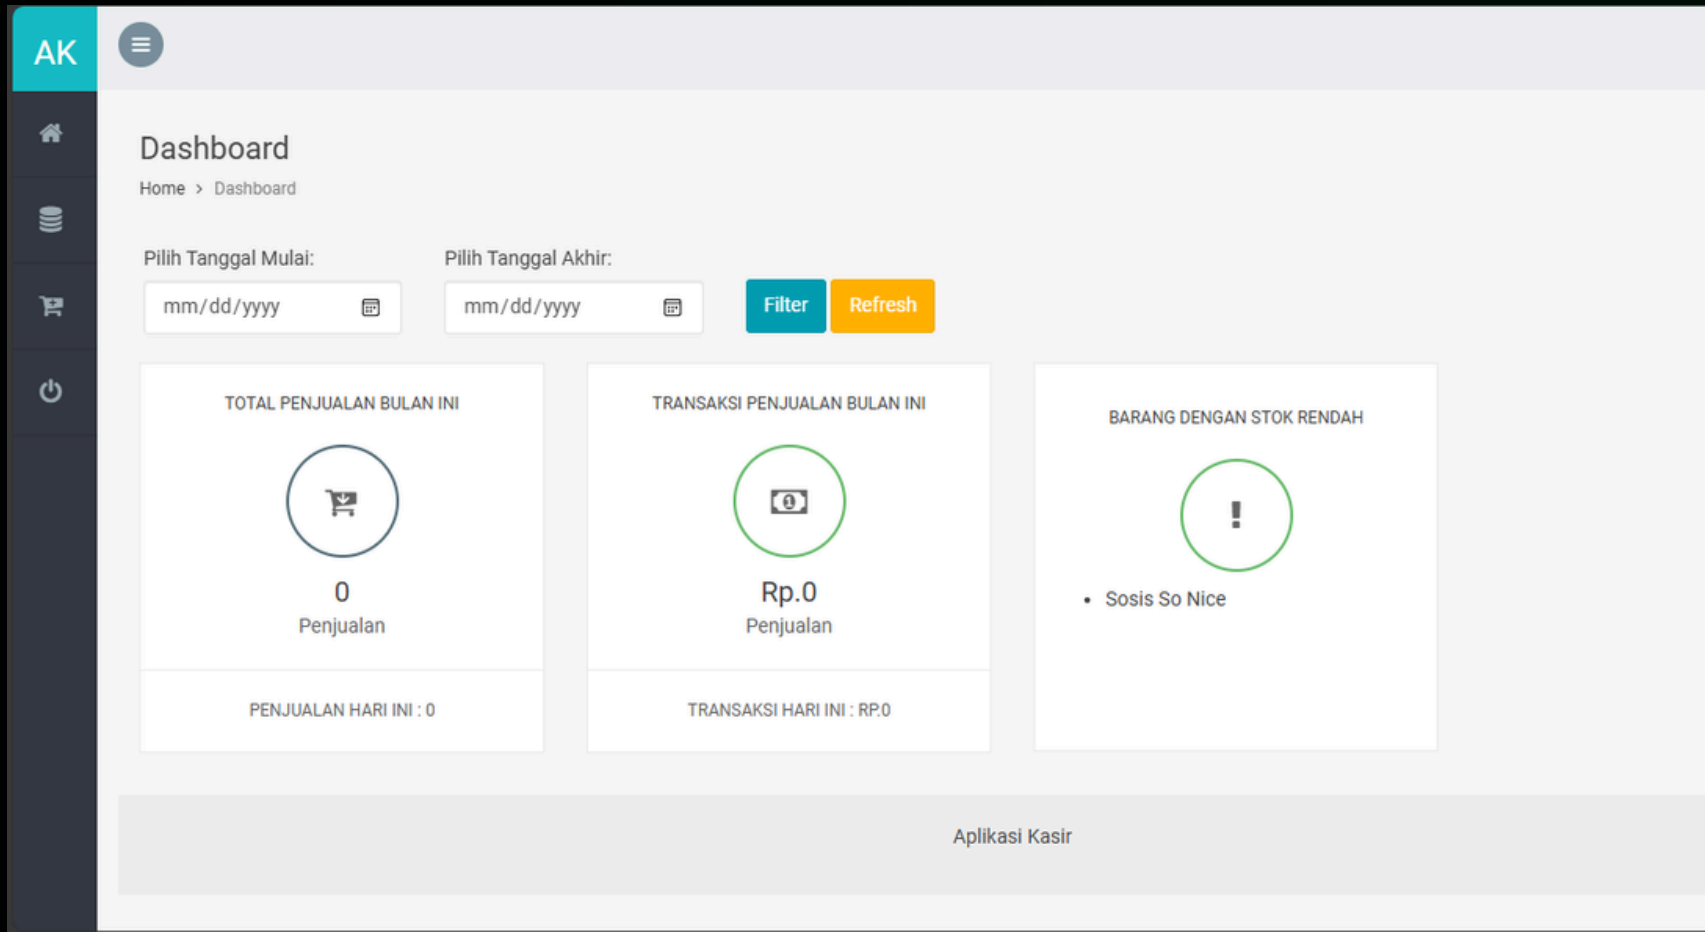

-  **Excel**
-  **Python**
-  **Pandas**
-  **Numpy**
-  **Matplotlib**

Data Management

- **Fast Typing**
 - **Accurate Typing**
 - **Copy Typing**
 - **File Management**
 - **Data Verification**
- 
- 

Project

1. Point of Sales based Web

The dashboard provides a comprehensive overview of the current sales performance. It includes filters for date ranges and buttons for filtering and refreshing data. Three main summary cards are displayed: Total Sales for the current month (0), Total Transactions for the current month (Rp.0), and a list of low-stock items (Sosis So Nice). Below these, daily sales and transaction totals are shown. The footer identifies the application as 'Aplikasi Kasir'.

Aplikasi Kasir

The transaction form is used to record individual sales. It includes a table for listing items with columns for item name, quantity, and discount. The form also contains fields for transaction date, customer selection, total amount, payment method, and a 'Submit' button. A 'Buka Penjualan' button is located in the top right corner.

Description:

This web-based Point of Sales (POS) application is designed to simplify the sales transaction process in retail stores or small business. It allows users to manage products, automatically records transactions, and monitor sales in real time.

The system is built using the Laravel framework and supports product data management and transaction history tracking. This application **aims** to replace manual record-keeping with a more efficient, error reducing, productivity-boosting for business.

Project

2. Digital Wedding Invitation Web

Description:

This is a front-end development project for creating a modern, interactive, and responsive digital wedding invitation. The project leverages a set of powerful web technologies to ensure a beautiful design, excellent cross-device compatibility, and core functionality like a countdown timer.

Tech Stack Used :

- HTML
- Bootstrap
- Javascript
- Countdown Package

Project

3. Portfolio Website

Description:

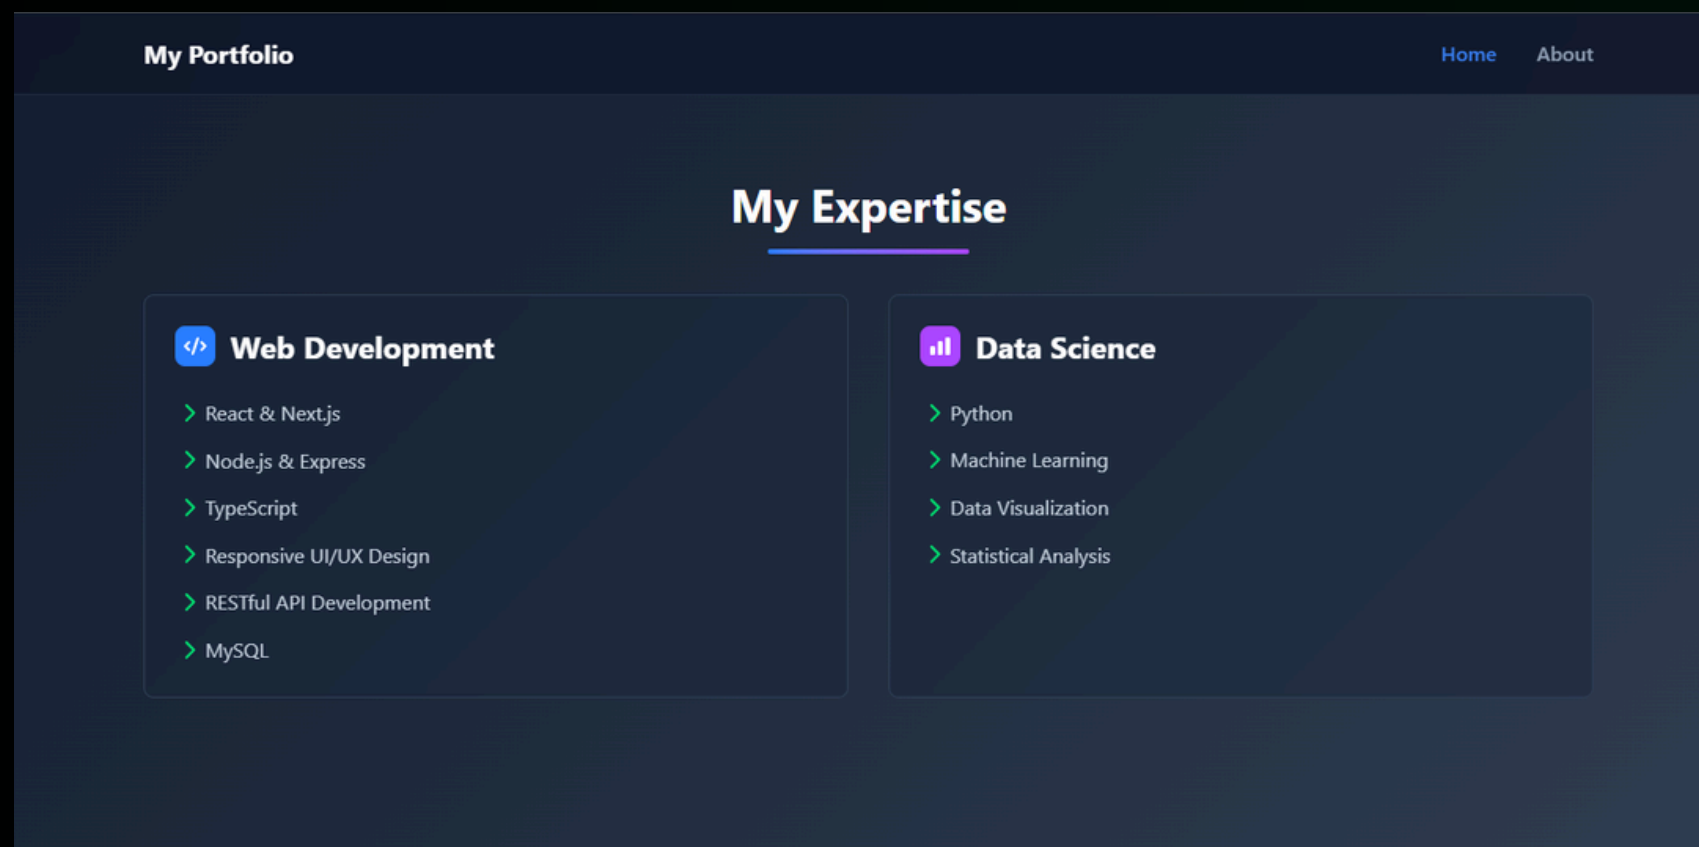

A Personal Full-Stack Portfolio Website demonstrating mastery of the React and Tailwind CSS ecosystem, enhanced by shadcn/ui for high-quality, accessible UI components. The ongoing development involves building dynamic RESTful APIs using Node.js and Express.js to manage project data stored in a MySQL database

Tech Stack Used :

- React
- Tailwind CSS
- Shadcn/ui
- Node.js
- Express.js
- MySQL

  }
}
```

Description:

This project is a backend application built with Express.js and Prisma, designed to manage user, contact, and address data. It features authentication and authorization using middleware and supports CRUD operations for both contacts and addresses. The routing structure is divided into public routes (for registration and login) and private routes (for authenticated data management). This Restful API is built to be secure, well-structured, and easily integrable with frontend applications

Tech Stack Used :

- Typescript
- Express JS
- Prisma
- Node.js
- MySQL

Project

4. Contact Management Api Project

```
import express from "express";
import { UserController } from "../controller/user-controller.js";

export const publicRouter = express.Router();
publicRouter.post("/api/users", UserController.register);
publicRouter.post("/api/users/login", UserController.login);
```

```
export const apiRouter = e.Router();
apiRouter.use(authMiddleware);

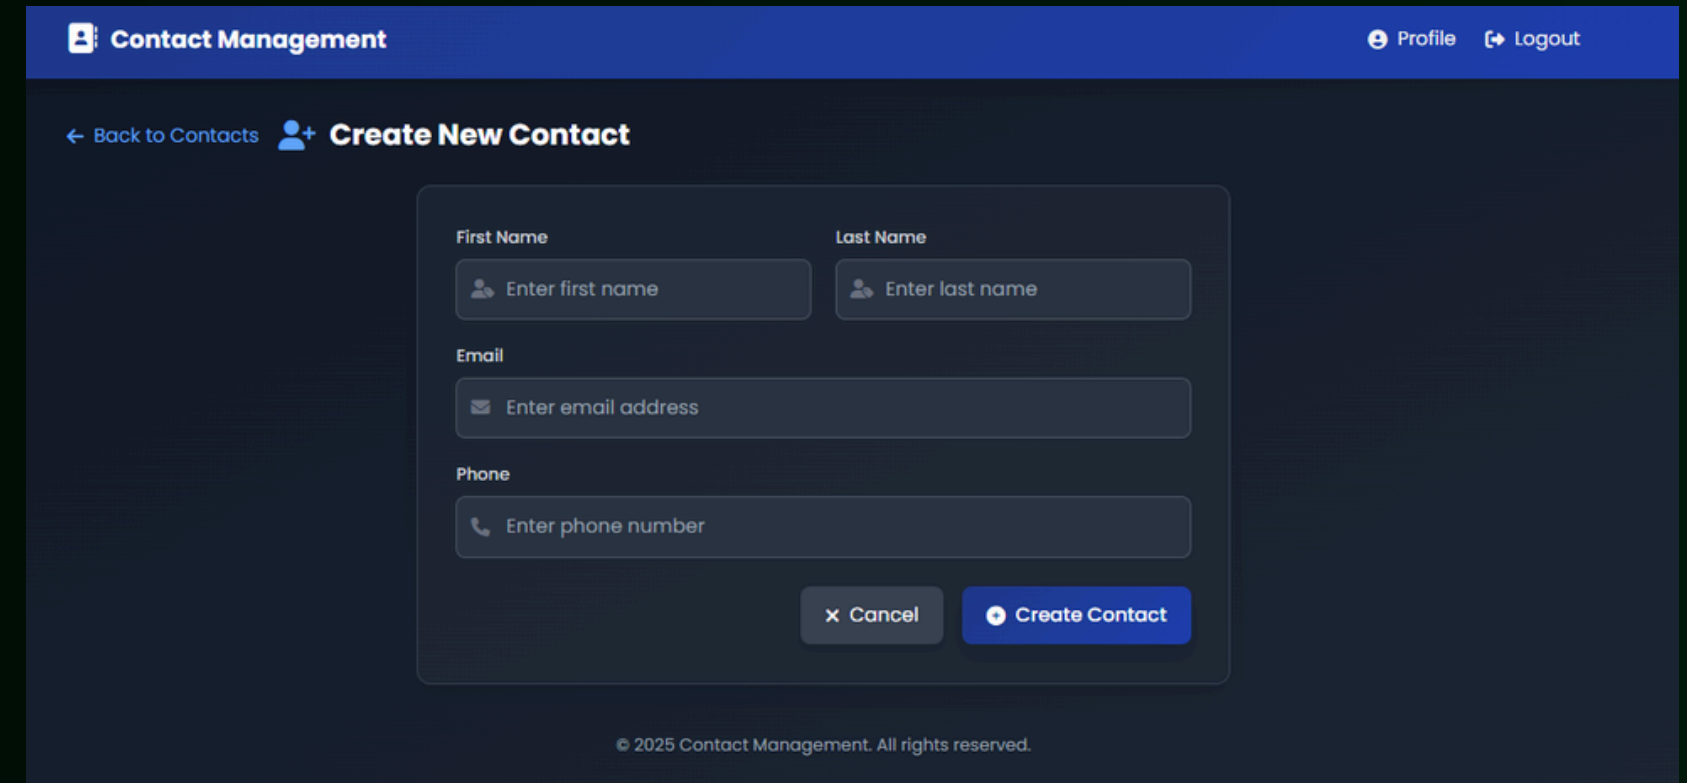

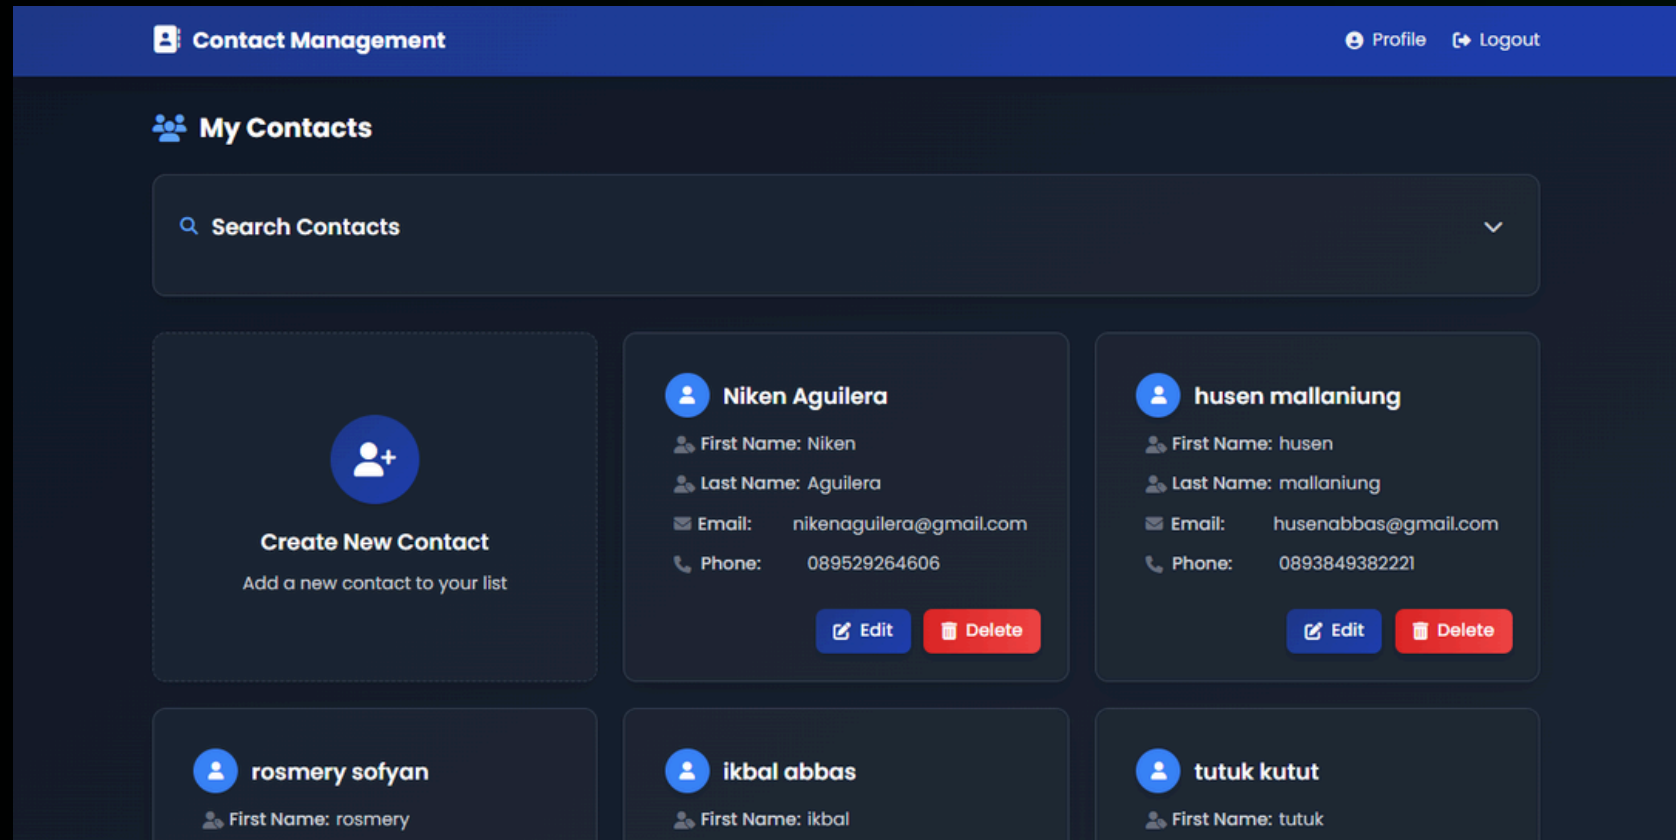

// User Api
apiRouter.get("/api/users/current", UserController.get);
apiRouter.patch("/api/users/current", UserController.update);
apiRouter.delete("/api/users/current", UserController.logout);

// Contact Api
apiRouter.post("/api/contacts", ContactController.create);
apiRouter.get("/api/contacts/:contactId", ContactController.get);
apiRouter.put("/api/contacts/:contactId", ContactController.update);
apiRouter.delete("/api/contacts/:contactId", ContactController.remove);
apiRouter.get("/api/contacts", ContactController.search);

// Address Api
apiRouter.post("/api/contacts/:contactId/addresses", AddressController.create);
apiRouter.get("/api/contacts/:contactId/addresses/:addressId", AddressController.get);
apiRouter.put("/api/contacts/:contactId/addresses/:addressId", AddressController.update);
apiRouter.delete("/api/contacts/:contactId/addresses/:addressId", AddressController.remove);
apiRouter.get("/api/contacts/:contactId/addresses", AddressController.list);
```

Project

5. Contact Management Front End

Description:

This Project is a web application built with React.js and Tailwind CSS, designed as the frontend interface for the Contact Management API. It provides an intuitive and responsive user experience for managing users, contacts, and addresses. The interface allows users to register, log in, view, add, edit, and delete contact or address data seamlessly. Tailwind CSS is used to create a clean and modern design, while React ensures efficient state management and dynamic rendering.

Tech Stack Used :

- React
- Tailwind

Certificate

1. Data Analyst

This intensive course equipped me with essential skills required for a data analyst, particularly in programming and data analysis using Python. Key topics I learned include:

- Fundamental of **Python Programming** for data analysis
- Working with **Numpy** for numerical computation and array manipulation
- Data cleaning and manipulation using **Pandas**
- Data visualization with **Matplotlib** for exploration and presentation

Certificate

M. Irhaf Jasi Jamal
HR & GA HEAD

During my internship at PT TRUST, I was responsible for supporting daily operational data management tasks. My key responsibilities included::

- Collecting and entering daily operational data into Microsoft Excel spreadsheets in an organized and systematic manner.
- Filtering and validating data to ensure accuracy and consistency before transferring it to summary reports.
- Assisting in preparing internal reports based on verified data.
- Coordinating with relevant staff to ensure data completeness and reliability for operational needs.

Certificate

3. On The Job Training (web)

During my Job Training at PT GreenNusa, I gained valuable experience in web application development using **Laravel**. Some of key areas I learned Include:

- Fundamentals of Laravel, Understanding the **MVC (Model-View-Controller)** concept and its role in web application development.
- Routing and Controllers, Implementing routing and controllers to manage data flow and application views.
- Database Migration, Creating and Managing database migrations to ensure efficient data structure

Certificate

4. Junior Web Development

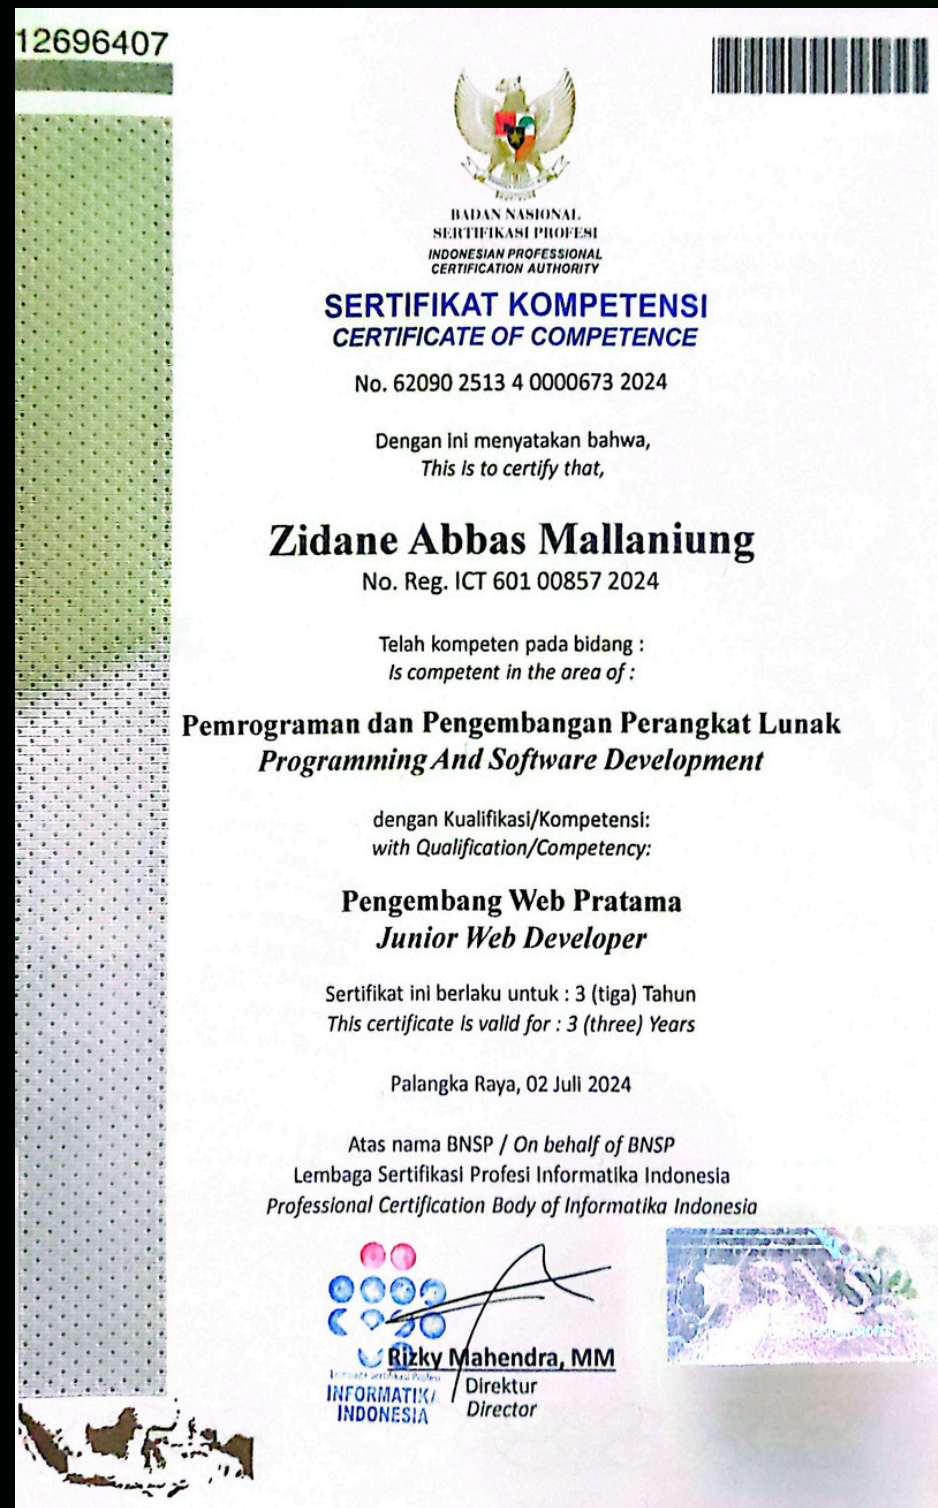

I received this certificate upon completing a Junior Web Development training program focused on building dynamic website using PHP. Through this train, I learned the fundamental of web development.

As part of the final project, I was given a case study to build library management website, which helped me apply all the skills I learned into a real world web application scenario.

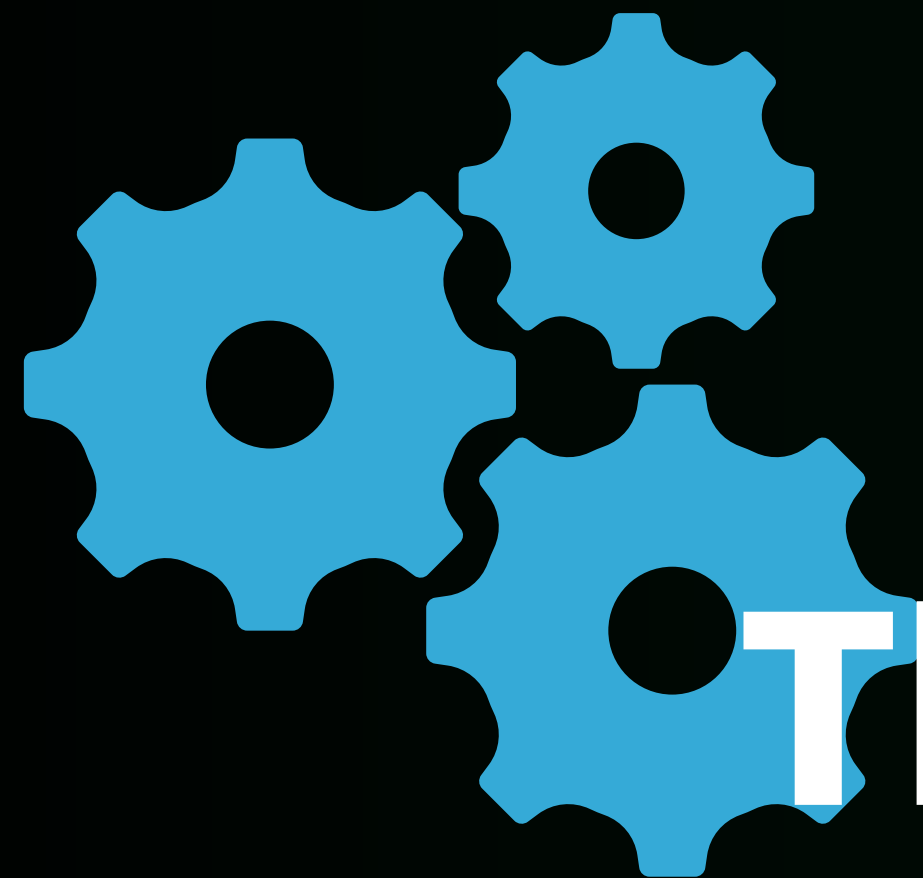

Certificate

5. Junior Web Development

I received this certificate upon completing a Junior Web Development training program focused on building dynamic website HTML, CSS, Javascript, NodeJS. Through this train, I learned the new tech of web development.

As part of the final project, I was given a case study to build CRUD Case, which helped me apply all the skills I learned into a real world web application scenario.

Thank You

FOR YOUR ATTENTION
